Vellore Institute of Technology

(Deemed to be University under section 3 of UGC Act, 1956)

Programme	:	B.Tech	Semester	:	Fall 22-23
Course	:	Robotic Process Automation LAB	Code	:	CSE2023
Faculty	:	Sakthivel V	Slot	:	L29+L30

Date: 16-09-2022

Name: P.Je Sai Kailash

Reg Num: 20BRS1208

Model Lab

Question (6)

Build a workflow using Format, Join, IndexOf, Split, and Substring methods that extracts key information from a text and prints in a different format.

- Use the text "You always wanted to study Automation Training. The materials are available in the following places: UiPath Blog, UiPath Academy." for extraction
- Extract "Automation Training" from the first sentence
- Extract "UiPath Blog" and "UiPath Academy" from the second sentence
- Display "get Automation Training from: UiPath Blog; UiPath Academy" in a message box

6.) Build a workflow using Format, Join, IndexOf, split & substring methods that extract the information from a text and prints it in a different format.

→ Text: "You always wanted to study Automation training. The materials are available in the foll. places: Vipath Blog Vipath academy" for extraction

→ Extract "Automation Training" from the 1st sentence

→ Extract "Vipath blog" and "Vipath Academy" from the 2nd sentence

→ Display "get Automation Training from: Vipath Blog; Vipath Academy" in a message box.

Process

- 1) Open ViPath
- 2) Click on create new Process and give a process name to the file.
- 3) Click on "create new workflow" after creating a process
- 4) Add a new Sequence Activity and rename the sequence to "Sequence - String Manipulation".
- 5) Right click on the sequence and click on add annotation and type "using Format, Join, IndexOf, split and substring methods to extract information."

6) Create 3 variables

Name	Datatype	Scope	Default
1) Var 1	String	"Sequence - String Manipulation"	
2) Var 2	String	"	
3) Var 3	List<String>	"	

↳ system.collections.generic.List.

- 7) Use the Assign Activity to ^{assign} ~~print~~ the message "You always wanted to study automation Training. The materials are available in the following places: Vipath Blog, Vipath Academy".

8) Create a assign activity and give Var1 as the required message.

9) Create another assign activity and name it as "Assign-Extraction"

Use:

~~msg~~. Split (":", ToString) to
 Var = ~~msg~~. Split(".", c). First.ToString.Substring(Var1.LastIndex
 of ("automation")) of ~~msg~~

10) Create another assign activity To store the
 "U: Path Blog" and "U: Path Academy" from the second
 sentence.

Var3 = Var1.Split(".", c)(1).ToString.Split(":", c). Last.
 ToString.Split(", c").ToList

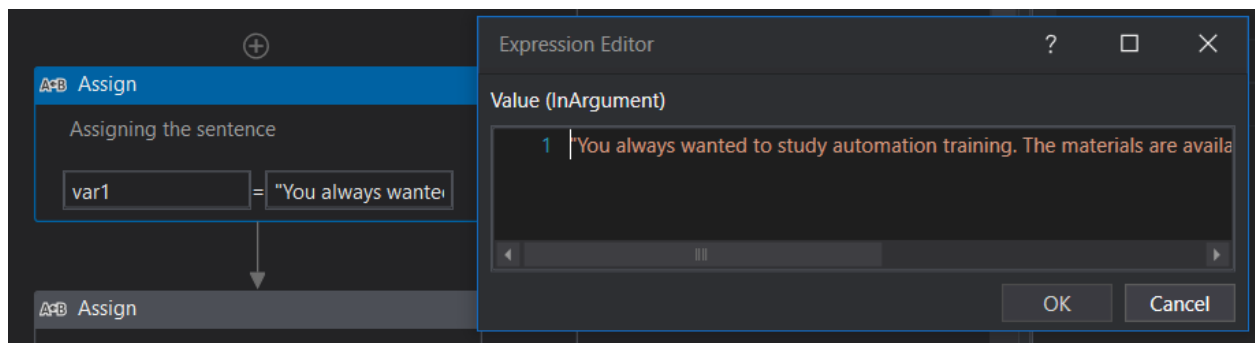

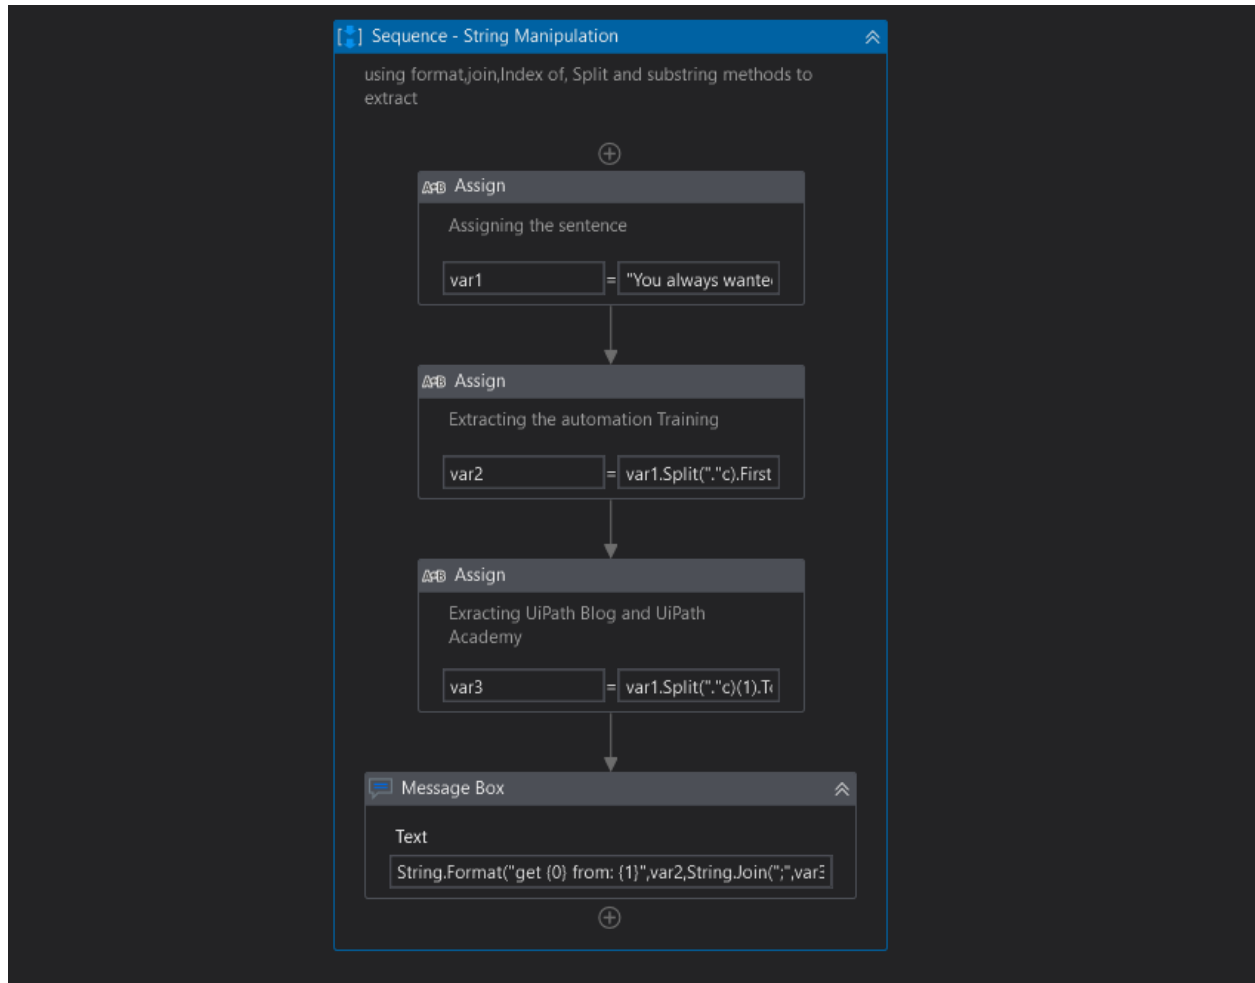

11) Finally use a message box Activity to print the
 required text.

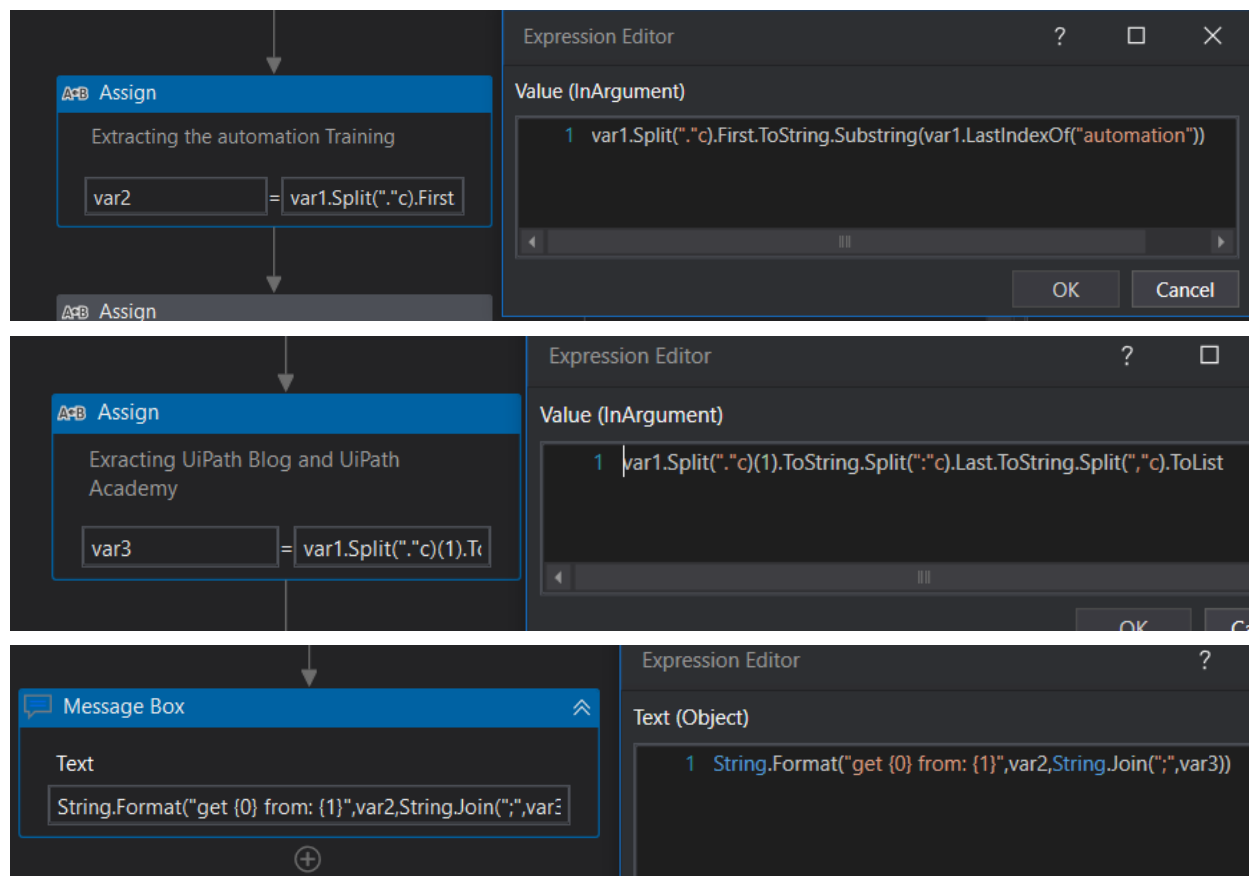

Type "String.Format ("{0} From: {1}", Var2, String.Join
 (";", Var3))"

in the message box.

12) Save and Run the workflow.

Workflow

Variables Used

Name	Variable type	Scope	Default
var1	String	Sequence - String...	Enter a VB expression
var2	String	Sequence - String...	Enter a VB expression
var3	List<String>	Sequence - String...	Enter a VB expression

Create Variable

Output
